## SUMMARY

Experienced full stack developer with expertise in Java stack, passionate about blockchain and web 3.0. Proven track record of delivering high-quality solutions, staying up-to-date with emerging technologies, and working effectively in cross-functional teams.

## SKILLS

- **Languages**: Solidity, JavaScript, Java, HTML, CSS
- **Frameworks**: React Js, Spring Boot, Hibernate
- **Libraries & Tools**: Ethers Js, Hardhat, Git, GitHub, Postman
- **Database**: MySQL, MongoDb
- **Soft Skills**: Quick Learner, Team Work, Flexible, Time Management

## EDUCATION

- **Paavai Engineering College** — Namakkal, Tamil Nadu, India
  *Bachelor of Engineering - Mechanical Engineering* — *Aug 2016 - Oct 2020*

## EXPERIENCE

- **Lentera Technologies Pvt Ltd** — Chennai, Tamil Nadu, India
  *Full Stack Developer (Full-time)* — *Feb 2023 - Present*
  - **Otomate Logic Labs**: Refactored the exsisting code and added extra logics to it. Wrote stored procedure logics in Mysql to call only required data from the database.
  - **Fuse CRM Application**: CRM application for managing customers data for one of our clients. Calling API's and checking everything works as expected. Creating API documents for all the classes.
    Adding extra columns to some fields in the frontend and in backend and storing the data in MongoDb.
    Reusing the exsisting code and writing extra functionality and writing API's for it as well.

## PROJECTS

- **Millow - Real Estate NFT Dapp**: (Tech: Solidity, JavaScript, Ethers js, React js, Hardhat)
  Millow is a real estate dapp where we can buy and sell our property by posting them in the form of NFT.
  First the seller posts their property and then it is converted to NFT, if the buyer is intersted they have to pay the min amount of ether as a deposit and the lender funds it then inspector approves the sale and finally the seller receives the funds and the buyer has the NFT. All the transactions are made through Metamask. (Mar 2023)

- **ERC-20 Token**: (Tech: Solidity, Ethers js)
  Created my own cryptocurrency token called UCL token in the Ethereum blockchain (Goerli Testnet) using solidity which has all the ERC20 standards and published on the etherscan (Jan 2023)

- **Fund Me**: (Tech: Solidity, Chainlink VRF)
  Fund me is a mini project built in the Ethereum blockchain using Goerli testnet. Its a simple contract that lets us to send and receive ethers with a min amount to be sent is 50 dollars in the form of ether.
  The real world price of ether is being referred with Chainlink price feeds. (Jan 2023)

- **Pig Game**: (Tech: JavaScript, HTML, CSS)   Live Project
  Pig is a simple dice game played with a single six-sided die. Players take turns rolling the die, and the goal is to be the first player to reach a score of 100 points. On each turn, a player can choose to either roll the die again or hold their score.
  If a player rolls a 1, their turn ends and they lose all points from that turn. (Aug 2022)

## ONLINE CODING BOOTCAMP

- **React - The Complete Guide (incl Hooks, React Router, Redux) , Udemy**: Learnt basics to in depth in React. (Mar 2023)
- **The Complete JavaScript Course 2023: From Zero to Expert!, Udemy**: Learnt basic to advanced level in JavaScript and did some projects while learning. (Jul 2022)

## HOBBIES

Playing Football, Photo Editing, Listening Music
